

Martín Areso

CTO & Fullstack SaaS Developer

 mirurozk@gmail.com  linkedin.com/in/martin-areso  Donostia, San Sebastián, Spain

CTO & Fullstack Developer specialized in modern SaaS architectures with **NestJS + PostgreSQL + Next.js**. Builder of scalable solutions from idea to production. Proven experience creating products with **real impact**: +100 active users, +1000 registrations in first weeks, Stripe integrations, WebSockets, and real-time systems.

PROFESSIONAL EXPERIENCE

Co-Founder & CTO - Trimio Learn Jan 2025 - Present

Educational SaaS for specialized instructors (barbers/tattoo artists). Complete architecture design and development from scratch with **NestJS + PostgreSQL + Next.js**. Payment system implementation with Stripe Connect, real-time communication with WebSockets, JWT authentication system, file management with Bunny.net. CI/CD configuration with GitHub Actions, infrastructure with Terraform and autoscaling, automated testing with Jest and API documentation with Swagger. Product developed in direct collaboration with barbers and industry influencers to validate functionalities.

Freelance Fullstack Developer - GetPolara.ai May - Jul 2025

AI-powered video generator development for growing startup. Complete stack: **Laravel + NeonDB + Stripe + Replicate API**. Custom credit system implementation, payment gateway with subscriptions and automatic renewals, transactional email system with Resend, Replicate API integration for video generation, complete admin panel. Management of +1000 active users with high concurrency. Achieved +1000 registrations in the first week of launch .

Shopify Backend Developer - Línea Gráfica Nov 2024 - Jan 2025

Specialist in massive e-commerce migrations from Prestashop to Shopify for leading digital printing company. Development of processing system for **hundreds of thousands of records** (products, customers, orders, categories). Creation of private Shopify apps for synchronization with external databases, implementation of modular architecture with workers for heavy tasks, adapters for different data formats and helpers for validations. Advanced mastery of Shopify GraphQL API and REST API, query optimization for high performance.

Creator & Fullstack Developer - 4Dawn (Shopify App) Feb - Oct 2024

Creation and launch of my first SaaS application in production: marketplace for custom visual sections for Shopify Themes, especially Dawn. Tech stack: Remix.js with TypeScript, Prisma ORM, GraphQL for Shopify communication, Stripe payment system with monthly subscriptions and individual purchases. Complete UI/UX design, fullstack development, hosting and domain configuration, user management and download system. Reached over 100 paying active users during launch period. Project discontinued due to strategic decision on maintenance costs.

Frontend Developer (React) - Cultzyme Sep - Nov 2024

Biotechnology company specialized in custom bio-reactors with team of engineers and biologists in San Sebastian. Responsible for complete UI redesign of their internal Web App, migrating from legacy design to modern React interface. Development of internal API consumption system for experiment monitoring, implementation of training and configuration system for experiments with LLM chatbot integration. Creation of desktop application with Electron for real-time bio-reactor monitoring using WebSockets and Pusher for bidirectional communication.

EDUCATION & CERTIFICATIONS

Higher Degree - Web Application Development

2022 - 2024 | IES Gregorio Salvador, Granada

Comprehensive web development training: Java/Spring programming, frontend development with NextJS/React, backend with PHP/Laravel, MySQL/PostgreSQL database management, agile methodologies and teamwork on real projects.

OCP Certification - Java SE (Tokio School)

2024 | 600h intensive practical training

Advanced Java specialization: object-oriented programming, interfaces and generics, JavaFX application development, JDBC database connection, design patterns, Eclipse/Maven/JUnit tools.

Mid-Level Degree - Microcomputer Systems & Networks

2020 - 2022 | IES Gregorio Salvador, Granada

IT systems fundamentals: Windows/Linux network administration, TCP/IP and HTTP protocols, cybersecurity, hardware configuration, operating system installation and maintenance.

TECH STACK

Frontend	Backend
Next.js 15, React, TailwindCSS, shadcn/ui, Zustand, Server Actions	NestJS, Laravel, Express, Prisma, PostgreSQL, GraphQL
DevOps	Payments
GitHub Actions, Terraform, Docker, Autoscaling, CI/CD	Stripe, Stripe Connect, Webhooks, Subscriptions
Real-time	Testing
WebSockets, Pusher, Live events	Jest, e2e testing, Swagger documentation

FEATURED PROJECTS

Trimio Learn

Complete educational SaaS platform. NestJS + PostgreSQL + Next.js architecture. Payment system, WebSockets, automated CI/CD.

4Dawn Shopify App

Visual marketplace for themes. +100 users, complete payment system, own design and development.

GetPolara.ai

AI video generator. Laravel + Stripe + Replicate. +1000 registrations first week.

TECHNICAL PRINCIPLES

- Clean & modular architectures
- SOLID principles
- Automation from day 1
- Testing & documentation
- Product-driven approach
- Security by design
